The Future of Oil and Gas – South Africa

17:00-19:00, Wednesday 7 June 2017

University of Cape Town and online

This two hour webinar / workshop will provide an opportunity to engage with a focused perspective on the medium- to long-term view on the future of oil and gas in South Africa and surrounding region. It is not intended to address the immediate challenges facing the sector but will ask some critical questions about the way forward and capture the complexity of the arguments, and point the way to an engagement model for all key stakeholders going forward.

Against this backdrop, this workshop will take a 10-25 year view on the future of the Oil & Gas sector in the region, and ask some critical questions about the way forward. All attendees are invited to contribute to visionary thinking, insightful commentary, and constructive debate on the future of oil and gas in the Southern African region.

Invited presenters include:

- Professor Stefaan Simons, Chair IChemE Energy Centre
- Professor Jim Petrie, IChemE Energy Centre Board member
- The South African National Energy Association
- The South African Oil and Gas Alliance
- The South African Petroleum Industry Association
- The Petroleum Agency of South Africa

Key topics for discussion will include:

1. How will the Oil & Gas sector respond to a low carbon energy future imperative?
2. What are the specific challenges and opportunities for South Africa and the region?

Programme:

1. Welcome and introductions
2. Focused perspectives from key professional bodies in South Africa
3. A summary panel discussion to address key questions
4. Question and answer session
5. Concluding remarks.

The workshop is free, and refreshments will be served.
