

Pervelan Govender
Head of the Technical Unit
IPP Office

Pervelan Govender holds a BSc. Eng. degree in Electrical Engineering and a B.Tech in Management. He is a professional Engineer with ECSA the Engineering Council of South Africa. Pervelan started his career in Eskom Distribution in 1997 dealing with PTM&C and Field Services. In 2003, he joined Eskom Transmission Grid Planning and was responsible for Long term Transmission Plans and Grid Connection of loads and generation to the Transmission network. Pervelan was a member of the Eskom working team that created the Renewable Energy Generation Integration Planning Guideline.

In 2015, after 19 years in the Power Grid Utility environment Pervelan joined the IPP Office. He currently is the Head of the Technical Unit, that is responsible for all technical related matters, in the IPP Office. One of his key focus areas is currently, to collaborate with Eskom on the unlocking Grid constraints in the power system to enable IPP Grid Connection.
