

Richard Ahlschlager
Global Service Leader for Transmission, Distribution and Control Projects
AURECON

Richard Ahlschlager is the Global Service Leader for Transmission, Distribution and Control Projects for Aurecon. He is considered a multi-disciplinary technical generalist on many aspects of power transmission and distribution and has the practical design and project management experience in both substation and line projects. He spent 10 years working for Eskom as a Protection and Technology specialist (primarily in Protection, Automation and DC Standby systems) where he represented Eskom on several National Working Groups. Richard was the EHV grid interface engineer (400kV and 275kV – primary and control plant) for the Contractor working on the 1GW OCG RSA Peakers projects at Avon and Dedisa.
