

Russia to hold 25th World Energy Congress in 2022

ST. PETERSBURG
2022

The World Energy Council is pleased to announce Russia as the winner of the bid to host the 2022 World Energy Congress, the premier triennial gathering of the energy sector. The announcement follows a vote by the Council's member countries in an excitingly contested campaign between Portugal, Russia and the USA. St Petersburg will become the site for the 25th World Energy Congress. **Dr Christoph Frei, Secretary General of the Council, commented:** "On behalf of the Council I want to congratulate Russia for winning the bid to host the 2022 Congress and thank all bidding countries for their excellent bids. The Portuguese, Russian and USA bid teams presented strong cases to host the event and it is clear that each of these cities would be an exciting and accomplished destination to host a World Energy Congress." The countdown is on until World Energy Week Milan

Only three months to go until the Italian Member Committee of the Council will host this year's World Energy Week in Milan. The Council's annual general gathering of global energy leaders to promote the sustainable supply and use of energy for the greatest benefit of all, will take place from 8 to 11 October, offering a wide range of activities and networking opportunities for the global energy community, including high-level, exclusive sessions that will convene Ministers and CEOs. 2018 World Energy Week aims to deepen issues related to the Energy Transition including dynamic resilience and blockchain and green financing. Energy for Germany - Facts, Perspectives and Positions in a global context

Approximately 95 percent of emissions in the EU-28 transport sector result from road traffic, and its emissions are currently rising. Among other key topics, improved emission reduction targets for new cars are currently being discussed at EU level. What other measures are being taken in the transport sector to achieve the Paris climate agreement targets? What role will e-mobility and synthetic fuels play in the future? In this context the German member committee of the World Energy Council, recently published their 2018 edition of 'Energy for Germany - Facts, Perspectives and Positions in a Global Context,' which focuses on 'Climate Protection for Road Traffic'.
