Faraday Grid in new partnership with World Energy Council

The World Energy Council and Faraday Grid have a shared goal of achieving a sustainable energy future. The two organisations will actively collaborate in a broad program of activities, starting with a project looking at how to address increased volatility in electricity grids as renewable energy penetration increases. Faraday Grid's collaboration with the World Energy Council, representing the entire energy spectrum, marks the latest milestone for the company as it continues to establish partnerships across all continents. Accelerating Global Energy Transition Whilst Achieving Resilience

A recent gathering of over 70 energy leaders, focussed on the urgent need for, as well as challenges and opportunities of, enabling dynamic resilience as part of successful global energy transition. The Council convened over 70 energy leaders on the 15th May 2019 at the offices of Marsh & McLennan Companies in Tower Hill, London. The conversations highlighted that dynamic resilience involves more than better risk management of individual assets - and building agile and adaptable capabilities, benefits from rehearsing actions together using new and different energy futures. Insights Workshop held during 2019 May Member Meetings

The Council’s Spanish Member Committee presents new publication

The Spanish Committee of the World Energy Council (CECME), the Spanish Energy Club (ENERCLUB) and the Spanish Institute for Strategic Studies (IEEE) presented the sixth edition of the publication "Energy and Geostrategy", on May 2 in the auditorium of the Repsol Campus, with more than 400 attendees. This project has been sponsored this year by Cepsa, Enagás and Repsol. [Read more](#)

Energy is key business programme topic at SPIEF 2019

The development and modernisation of the energy sector will be one of the key topics of the St. Petersburg International Economic Forum business programme. In 2015, the UN member states unanimously supported the resolution ‘Transforming Our World: The 2030 Agenda for Sustainable Development’. The agenda defines an action plan for raising living standards, preserving the planet and achieving prosperity. Oil and gas will retain a systemic role in the global structure of energy resources. Turkey’s Energy Market Financing: Sustainability and investment opportunities

On May 2, 2019, World Energy Council Turkey convened a high-level event on the outlook for energy market financing in Turkey. World Energy Council Turkey brought together representatives of the energy and financial sectors on the event called “Turkey’s Energy Market Financing” in Istanbul. The half-day event, which featured a diverse set of international experts and energy sector leaders, was focused on two panels covering the subjects of Turkey’s “Financial Sustainability” and “Investment Opportunities in Energy Markets”. Women in Energy shine brightly in Chile

The [Chilean chapter of the World Energy Council](#) has developed a Women in Energy Chile programme in partnership with Deloitte, which looks to help women integrate at an early stage into a leadership network within the energy industry. This will enable greater opportunities, drive knowledge sharing and bolster new thinking in an industry that needs fresh ideas and perspectives. [Read more](#)

Organise a national event to promote innovation in your country

Member Committees are warmly encouraged to organise national events or awards before or after the Tech Festival inviting their national start-ups to promote innovation in their country. For more information or support, do not hesitate to contact **Francisco Galtieri, Senior Manager, Platforms & Academy**, galtieri@worldenergy.org.
